

This pattern will allow you to create the leaf-patterned lampshade shown in the Sept/Oct 2010 issue of *My Home My Style*. See pages 10-13 of that issue for more information.

1) Measure the circumference of your lamp shade to determine the number of veneer pieces needed (we used six).

2) Print as many copies of this pattern as you need for your shade.

3) Separate the pattern into two halves, and then tape the pieces to the veneer, as shown on page 13 of the magazine. Cut through the pattern and veneer to form the leaf shapes.
